Grade Journey for eLearn Ultra (Gradebook)

Watch the video guides and follow the steps below to set up the SYS/L2SYS and perform the grade transfer eLearn Ultra course site.

A) For the teaching course site

Step 1: Post grades

This step is mandatory in an eLearn Ultra course. If you do not want students to view their grades, please hide the relevant grade columns before posting the grades.

Step 2: Configure predefined grade column

GB Predefined Column Configuration

Step 3: Configure SYS/L2SYS grade column

GB SYS & L2SYS Configuration

Step 4: Grade approval and transfer

GB GradeTransfer

B) For the Resit course site

We are pleased to announce that the **resit course site grade transfer process has been enhanced** to provide a more streamlined and efficient experience for lecturers.

What's New?

Starting from **19 May 2025**, lecturers **no longer need to manually create grade columns** and **copy students' passed marks** into the resit course site.

The **EMX system will now automatically:**

- Create the required **"SYS-"** and **"RS-"** grade columns based on the assessment setup.
- Sync the **passed component marks** directly into the appropriate **"RS-"** grade columns in the resit course site.

What You Need to Do

Lecturers only need to:

- Enter the **resit exam marks** in the relevant **"RS-"** grade column.
- Ensure all **RS columns are posted** before triggering the grade transfer.
- Configure the **SYS column** and map it to the relevant RS grade columns. Eg: SYS-CONTINUOUS ASSESSMENT map to RS-CONTINUOUS ASSESSMENT.
- Trigger the **Grade Approval and Transfer** process.

This improvement is part of our ongoing efforts to reduce manual work and improve accuracy in grade processing.
